Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/662,602	Applicant(s) HUANG ET AL.	
	Examiner Leonard Saint-Cyr	Art Unit 2626	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 April 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Amended claims 17 – 21, and 23 – 26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. On page 15, lines 19 – 25 of the specification, the applicant only describes that the test corpus is manually annotated to be used as a standard output of a Chinese word segmentation system. The written description does not provide any such teaching of annotating a second corpus text using computer, only manual annotation is used. Thus, annotation using computer is considered as new matter.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the

Art Unit: 2626

applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 27 - 30 are rejected under 35 U.S.C. 102(e) as being anticipated by Wu (Customizable Segmentation of Morphologically Derived Words in Chinese; February 2003).

As per claim 27, Wu teaches a method for evaluating a word segmentation language model, comprising:

building the word segmentation language model based on an annotated corpus; applying the language model to a test corpus of unsegmented text different from the annotated corpus to provide an output indicative of words in the test corpus ("a language model is used to select the best sequence of characters"; page 2, paragraph 2, lines 9 – 11; page 9, paragraph 4, lines 6, and 7);

comparing the output of the language model with a predefined word segmentation of words of the test corpus; and evaluating the language model based on the comparison of the output and the predefined word segmentation to provide an indication of effectiveness of the language model as a function of individual types of words ("the segmentation units need to be adjusted against the perplexity of the model" page 3, lines 31 – 36; page 11, lines 23 – 25).

As per claim 28, Wu further discloses identifying words in the output that match words in the predefined word segmentation ("select the correct character sequence"; page 11, lines 23 – 25).

As per claims 29, and 30, Wu further discloses comparing person names, locations, organization names, overlapping ambiguous strings and covering ambiguous strings in the output and the predefined word segmentation ("page 12, paragraphs 2.5 – 2.5.2).

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
